

Double Deflection Grille (DDG)

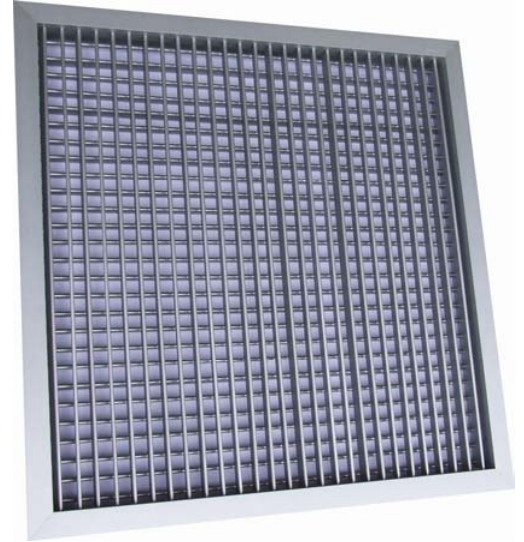

Finish Standard: Satin anodised AA5 natural.

Optional: Polyester powder coated to RAL or BS colours.

Borders Standard: 32mm.

Fixings Optional: All fixings are by request only.

Dampers Opposed Blade Dampers (Type D), if required are permanently fixed by pop rivet to the grille and are operated through the grille face.

Double Deflection Grilles have two rows of vertical and horizontal individually adjustable blades held in position by high tensile spring wire.

Type DDG grilles are suitable for supply applications in ceilings where maximum spread of air is required.
