The Monsoon UNAV 125 distribution system is a range of easy-to-install and easy-to-maintain diffusers for MEV and MVHR systems. Each diffuser is suitable for both supply and extract and is available in 3 attractive designs. Air volume can be adjusted and locked within the valve; the exterior of the valve will therefore always look the same – regardless of airflow.

Performance

Valve Open	Supply		Extraction	
	13l/s	21l/s	13l/s	21l/s
100%	< 22 dB(A)	25 dB(A)	< 22 dB(A)	24 dB(A)
50%	23 dB(A)	29 dB(A)	< 22 dB(A)	25 dB(A)
