The Sunburst radiant heater is the ideal choice for those that want to use their outdoor space. This radiant heater is great for pubs, cafés, bars, restaurants and installation at home with a heating range of 10-12m². The heater comes delivered with an easy-to-mount wall bracket and cable to speed up installation.

The heater is powerful due to a low glare amber halogen lamp and reflector technology, allowing you to extend the time you spend outside. The Sunburst comes with two years warranty and is IP65 rated, making it ideal for outdoor applications. It is silent in operation, ensuring you get to truly enjoy the outdoors, and there are no annual maintenance costs.
