Overview

The Stanza fan is a stylish, modern ceiling fan, ideal for homes, offices, stores, shops and many other applications*. The precision moulded glass fibre composite blades give increased stability and higher airflow, working to cool the environment in summer months. In winter months, the Stanza can be set to Eco mode, which will gently recirculate heat from the ceiling towards occupants, therefore helping to conserve energy.

There are three settable speeds on the Stanza fan, which can be set with the remote control that is included. The ceiling fan can displace air at either 5,700, 8640 or 11,700 m³/h, depending on the speed that has been selected.

The motor in the Stanza fan uses the latest developments in ceiling fan motor engineering. It means that the fan offers enhanced efficiency and performance. The motor, in conjunction with the moulded blades, provides more air movement per. watt of power, therefore using less energy to provide better air circulation.

Each fan is individually tested and quality checked to ensure trouble free operation. The Stanza fan also has a four year warranty for peace of mind.

LED Light

The Stanza LED model uses a 20 watt LED acrylic light to add dual functionality to the fan. The light can be set at 25%, 50%, 75% or 100% to suit the needs of the occupant, simply by changing the setting on the remote.

Ceiling Fan Controller

The Stanza ceiling fan comes delivered with a three speed remote control. You are able to change the fan speed using Eco, Medium or High buttons accordingly. It is recommended that Eco mode is used in winter to re-circulate warm air at low speeds.

The remote uses radio frequency, so that you can operate the fan at long distances.

There is a four step dimmable light function, allowing you to change the brightness of the light to either 100%, 75%, 50% or 25%. The remote also has quick connect terminals.
